**Re: Application of Nevada Organix LLC for use permit at
3130 Deer Run Road, Carson City, Nevada
Hearing Date: January 28, 2015**

Dear Commissioners:

I am a co-trustee and the administrating co-trustee of the trusts which own property at 5655 Morgan Mill Road, Carson City, Nevada. The property location is served by the portion of Deer Run Road which is the site of the use permit application of Nevada Organix LLC for the marijuana cultivation and production of marijuana referenced above. The properties are within two (2) "blocks of one another in this relatively low-density industrial zone.

The premises at 5655 Morgan Mill Road is the home to the Carson City District Office of the U.S. Bureau of Land Management. That office manages very nearly five million (5,000,000) acres of federal land resources situated in Western Nevada. It is home to more than one hundred twenty-five (125) federal government employees. Also nearby and also served by the same segment of Deer Run Road is the Carson City office of the U.S. Geological Survey situated at 2730 Deer Run Road. That is home to several dozen more federal government employees.

Whatever the merits of permitting the cultivation of marijuana within the City of Carson City, the activity remains unlawful under federal law. Permitting cultivation and production of marijuana upon the gateway to the locations of two (2) sizeable federal agency offices would, at the very least, be a snub by the city of these federal agencies, if not outright irresponsible and insulting to those agencies.

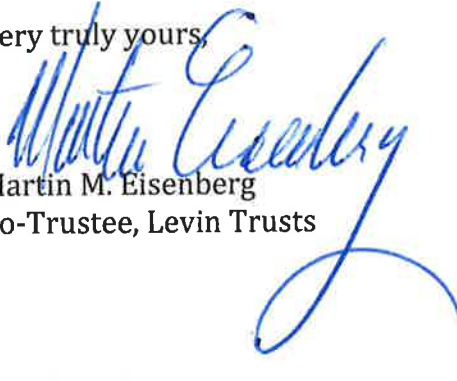

The City should be honored to have these federal agencies select its environs for the location of offices. They provide substantial employment and local commerce. They are valuable tenants to this industrial zone. A marijuana cultivation and production facility in such proximity to these substantial federal offices risks the

agencies moving elsewhere to a city having more appreciation and respect for the value each has to contribute.

I urge that the subject use permit be declined. If the City of Carson City desires to opt into the cultivation and production of marijuana, a more appropriate location be selected which does not jeopardize nearly two hundred (200) jobs within the city.

Very truly yours,

Martin M. Eisenberg
Co-Trustee, Levin Trusts
