## **Background/Issues & Analysis**

The Carson City Capital Improvement Program (CIP) is a 5-year schedule of public physical improvements to the City's infrastructure and other one-time capital purchases considered to be operational in nature. The CIP sets forth proposed expenditures for systematically constructing, upgrading, expanding, and replacing the community's infrastructure. Projects are typically major expenditures. They can be either infrequent projects, such as the Water Resource Recovery Facility rehabilitation or systematic improvements, such as parking lot maintenance. Staff coordinates a project with any related projects, reviews the project in order to determine how completing the project will accomplish the goals and policies of Carson City, identifies a funding source and develops a project schedule. Projects are reviewed by the responsible department and placed within the department's 5-year schedule.

During the annual review of the 5-year CIP, completed projects are removed, new projects are proposed and scheduled projects are moved forward through the schedule or moved to later years. The timing of a project is dependent on the current condition of the infrastructure and funding availability.

Due to limited resources, the current proposed projects have a very high priority or are projects that have specific revenue sources such as county option motor vehicle fuel and sales and use taxes, state motor vehicle fuel taxes, debt or Federal, State and Local grants.

The 5-year Capital Improvement Programs for the Water, Sewer, and Storm Drainage Funds were presented to the Utility Financial Oversight Committee on March 20, 2018. The Committee's recommendation will be presented to the Board of Supervisors as a separate agenda item by the Committee Chair. The Committee's recommendation is to approve the FY 2019 budgets.

**Applicable Statute, Code, Policy, Rule or Regulation**
