SECTION III FLOODPROOFING CERTIFICATION (Certification by a Registered Professional Engineer or Architect)

I certify to the best of my knowledge, information, and belief, that the building is designed so that the building is watertight, with walls substantially impermeable to the passage of water and structural components having the capability of resisting hydrostatic and hydrodynamic loads and effects of buoyancy that would be caused by the flood depths, pressures velocities, impact and uplift forces associated with the base flood.

YES ☐ NO ☐ In the event of flooding, will this degree of floodproofing be achieved with human intervention?

(Human intervention means that water will enter the building when floods up to the base flood level occur unless measures are taken prior to the flood to prevent entry of water (e.g., bolting metal shields over doors and windows).

YES ☐ NO ☐ Will the building be occupied as a residence?

If the answer to both questions is YES, the floodproofing cannot be credited for rating purposes and the actual lowest floor must be completed and certified instead. Complete both the elevation and floodproofing certificates.

FIRM ZONES A, A1-A30, V1-V30, AO and AH;

Certified Floodproofed Elevation is _____ feet, (NGVD).

Re: FEMA Elevation Certificate Previously Submitted for 4493
East Nye Lane, Carson City, Nevada

Dear Sirs:

I have noted an error in the subject Elevation Certificate. The FIRM Zone should be Zone "A" not Zone "C" as shown in Section 1. Also, the date of construction was 1987.

If you have any questions, please contact me at your convenience.

Sincerely,

JAMES P. HADDAN, C.E., P.L.S.
