

# STAFF REPORT

## Agenda Item: 5

**Report To:** Open Space Advisory Committee

**Meeting Date:** August 17, 2020

**Staff Contact:** Gregg Berggren, Trails Coordinator, [gberrgren@carson.org](mailto:gberrgren@carson.org)

**Agenda Title:** For Discussion Only: Review and discussion regarding Michael Service's Eagle Scout Project for repair and maintenance of the "C" on C-Hill. (*Gregg Berggren*)

**Staff Summary:** See below

**Agenda Action:** Other/presentation

**Time Requested:** 10 minutes

---

Mr. Michael Service will discuss his Eagle Scout project on C-Hill. In his PowerPoint presentation, Michael will share his proposed project in which he will conduct repair and maintenance to the "C" on C-Hill. Trails Coordinator Gregg Berggren is the staff lead who is assisting with the planning and project implementation.

# Eagle Scout Project for C-Hill

**By: Michael Service**  
With Gregg Berggren as project liaison

# Description of project

For my Eagle scout project, I will be resetting C-Hill back to a 'C' from the 20 it currently is. In this project I will be:

- Moving the painted rocks
- Pulling weeds that surround the letter
- Repainting some faded rocks

This will restore the letter back to the 'C' after it being changed for the graduating class of 2020

# Before images and specific improvements

---

For my Project I will be:

- Replacing the 20 back to a 'C'.
- Pulling the sagebrush and weeds surrounding or in the 'C'.
- Repainting faded rocks.

# Dates and Materials

— — —

I will provide Scouts with all the food (snacks, water, etc.) The participants will need to bring:

- Closed toe shoes
- A hat
- Sunglasses
- Sunscreen
- Long sleeve shirts and pants
- Masks
- Some tools that we will have are shovels, clippers, and trash bags
- Gloves (they will have extra gloves for those who need them)
- Some paint
- Brushes

I will be in charge of gathering the scouts for the project. I am aiming to accomplish this project late August and/or early September. The exact date is to be determined.

# Safety concerns, and precautions

---

- People cutting fingers while pulling weeds from the 'C';
- Heat exhaustion and dehydration;
- People tripping on the hill;
- People not watching where they are placing the rocks and the tools.

As there is no real machinery involved, I am not overly concerned that there will be many issues. However, we do need to take precautions and watch what we're doing at all times. The volunteers will need to sign a waiver, and there will be a first aid kit in case of emergencies.

---

**Thank you for your support, any questions?**
