I am writing because I want Carson City officials to know that maintenance of our parks and facilities, in this case our tennis court at Centennial, are of utmost importance for the quality of life of our community. We have had a terribly hard year and all of us need places we can go for exercise, outside time, social time and sport. Allocating money for this purpose will show our residents that you too value this priority. I hope you will consider this very important request and I thank every one of you for your time and commitment to Carson City.

Thank you,
Kristin Robison

For April 15, 2021 Carson City Board of Supervisors Meeting

Re: Item 17C Budget Request for Centennial Tennis Courts

Dear Carson City Board of Supervisors:

We are writing to enthusiastically support the budget proposed for reconstruction of four court surfaces at the Centennial Tennis Courts. As residents of Carson City, our family plays tennis and often uses these courts and the park pavilion. The courts have been the victim of deferred maintenance for over a decade. Some cracks were attempted to be patched multiple years ago but have long since decayed. Currently only five of the eight courts are playable, but none are in good enough condition to host a tournament. Please note the photos of the courts below so you will understand their dire condition.

Courts 3 & 4

Courts 7 & 8

Tennis is a lifelong sport. During COVID, tennis has been the ideal sport to play as it is inherently socially distanced. The courts have been well used! Even in the winter months on a sunny day people are using these facilities. Despite their poor condition the courts with nets were all being used on Sunday March 14th. One couple was even playing on one of the courts in super rough shape as all the others were taken.

It is hoped that if the funding request is approved, it will be leveraged as match for an additional grant from the Land and Water Conservation Fund, the United States Tennis Association (USTA) and/or a private foundation so potentially all eight courts could be reconstructed. Once all eight courts are fully reconstructed, not only would there be courts available for the public's use, Carson City could then again host tennis camps, and revenue generating tournaments for juniors and adults. We travel to California often for our son to play in USTA and Universal Tennis Rating (UTR) events as there are very few tournaments in the local area (all being in the Reno area during the summer). Local camps and tournaments help maintain and grow tennis participation in the area.

The tennis community is super excited to support this funding proposal. The CC Parks Foundation holds ~\$15,000 in funds from the former CC Tennis Club. This funding could perhaps be match, or continue to be used to benefit the courts in a number of ways such as buying nets, shade cloth, etc. My family would be willing to help in a myriad of ways such as post construction clean up and landscaping, painting of facilities, etc. We urge the CC Supervisors to approve this funding and allow staff to leverage the funds so all the courts at the Centennial facility can be renovated.

Thank you for all you do and your time and consideration on this matter.

Sincerely,

Brenda Hunt

Jon Paul Kiel

Ryder Kiel

Date: Sunday, April 11, 2021 3:57:45 PM

This message originated outside of Carson City's email system. Use caution if this message contains attachments, links, or requests for information.

Dear Carson City Board of Supervisors:

I am writing to join the chorus of Carson City residents who are thrilled by the prospect of having playable tennis courts in our community again. When I first came to Carson City in 1999, the tennis club was thriving with over a hundred members, an active league, weekly drop-in schedules, multiple tournaments every year, tennis social events and tennis pro clinics throughout the season. A few key members provided great leadership with many others contributing in supportive roles.

Over time, we lost some of those key leadership members and then with the great recession regular maintenance was neglected. Now the courts at Centennial are so badly damaged that they are mostly unplayable and even hazardous in some cases.

Although some of the old members have transitioned to playing pickleball, many of us still love to play tennis and we are traveling to play on courts in Douglas County, where you will find Carson City residents any day of the week, in every season of the year.

I am delighted to learn of the proposed reconstruction of four tennis court surfaces at Centennial Park and the potential for matching funds to reconstruct the remaining four courts there. I fully support this proposal and appreciate the efforts and support of the Board of Supervisors to make it a reality.

Thank you for your service!

News reports have characterized this as the possible development of affordable/workforce housing located at 3410 Butti Way.

"Affordable/workforce housing" seems to be quite the buzzwords in Council chambers all across Nevada, these days. What I have seen of similar projects, they typically turn out to be either government subsidized housing with low-income qualification (sometimes referred to as Section 8 housing) or income restricted housing (with gross income limits at about \$25,000-\$30,000 per year for HUD projects).

I wish for the members of the Council to consider that, with median home prices in Northern Nevada now approaching ten times the gross median earnings of our citizens (around \$50,000) there is a significant gap in what is affordable and the available wages that are being paid in this region.

There are plenty of housing projects around this region already built or in the works that are income restricted or Section 8, and that serve those with \$25,000-\$35,000 annual gross income.

If we were to help get more housing in Carson City that is affordable to the median income earners, that housing would be in the \$200,000 to \$300,000 range for detached homes and \$100,000 to \$180,000 for duplexes and condominiums.

Members of Council could stimulate local job creation as well as create the sort of housing that would be affordable to the typical working class citizen, by offering the land for sale to local builders with conditions on the type of housing to be built. We need something along the lines of the Levittown development in New York after WWII: Small, economically priced houses that can be bought by working class citizens; without some government bureaucrat picking winners and losers based on some contrived criteria born in Washington D.C.

Warm regards,
Tyler

This message originated outside of Carson City's email system. Use caution if this message contains attachments, links, or requests for information.

I am appalled and disgusted at the comments made on social media by Planning Commissioner Nathaniel Killgore and his opinion on women. I do not believe that anyone who makes comments such as those or refuses to take responsibility for their actions and apologize has any right to be a representative for our community, especially on a board so integral to Carson City as a whole. He has offered many excuses such as someone faking a screenshot, to someone hacking his account, to there being a mysterious "architect" who is working against him, but all of these excuses fall flat in the wake of evidence being brought against him. I believe he should be terminated from his position immediately and that those on the board of supervisors should take care to investigate the character of those they appoint to important positions within our community.

Thank you for your time.

Kelsey Penrose.

I think there should be an investigation into the comments made by Planning Commissioner Nathaniel Kilgore. The comments he made were disgusting, denegrating to women, and have no place in city management.

He posted on facebook that someone had made a fake post but then later said the post DID come from his account but it was someone else who made it. There is also an audio recording of him threatening the mother of his child that was shared, as well as hundreds of comments sharing stories from other women who have been harassed by him.

This needs to be investigated and he needs to be taken off of the planning commission and any other roles he holds in Carson City government.

Sincerely,
Jess Wright.

Local camps and tournaments help maintain and grow tennis participation in the area.

We are aware that the City is most interested in supporting park facilities with the most usage and opportunity for revenue and Centennial fits those requirements. Where we used to have lessons, tournaments, leagues and recreational play, the state of the courts has forced players to go to other courts – in other counties. We would love to bring back tennis to our city!

The tennis community is super excited to support this funding proposal and we urge the CC Supervisors to approve this funding so it can be leveraged to renovate all eight courts at the Centennial facility.

Thank you for your consideration.

This message originated outside of Carson City's email system. Use caution if this message contains attachments, links, or requests for information.

I was born and raised here in Carson City. I started playing tennis at the age of 8. I have personally had to join Zephyr Cove Tennis Club because of the horrible condition of the eight courts at Centennial Park.

I was in contact with Lori Bagwell, Jennifer Budge and Dan Kastens a few years ago about this. In the meantime, courts are becoming unplayable. Being frustrated I took myself out of the conversation.

I taught junior lessons for years out there. Justin Clark had a Tahoe Tennis Academy for 4-5 years. Eldon Wilson has given group lessons since Justin left.

Carson Tennis Club had a couple tournaments a year as fundraisers for CTC. Those tournaments used to draw 50-100 players, many from out of town. We obviously cannot do that now!

The longer the courts are not maintained, the more expensive repairs will be.

It's a travesty that these courts have not been maintained.

Thank you for at least addressing this matter.

Dear Carson City Board of Supervisors:

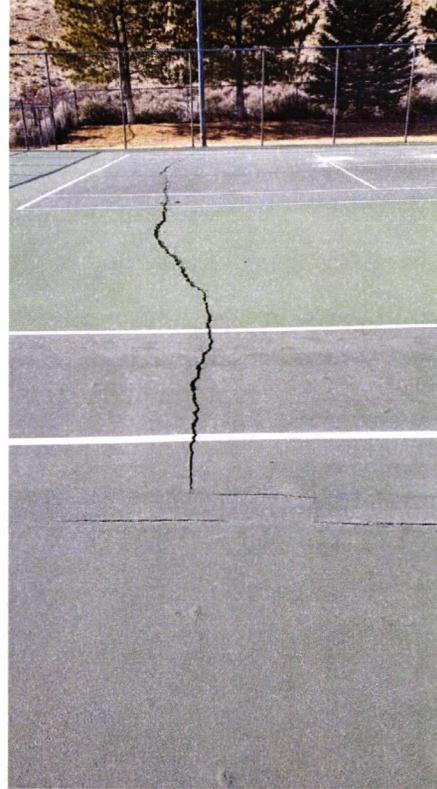

I am/We are writing to enthusiastically support of the budget proposed for reconstruction of four court surfaces at the Centennial Tennis Courts. As residents of Carson City, our family plays tennis and often uses these courts and the park pavilion. The courts have been the victim of deferred maintenance for over a decade. Some cracks were attempted to be patched multiple years ago but have long since decayed. Currently only five of the eight courts are playable, but none are in good enough condition to host a tournament. Here are a couple of pictures of the courts so you will understand their dire condition.

Courts 3 & 4

Courts 7

Court 7 & 8

Tennis is a lifelong sport. During COVID, it has been the perfect sport as it is automatically socially distanced. The courts have been well used! Even in the winter months on a sunny day people are using these facilities. Even in the condition the courts are in, on Sunday March 14th, the courts were full. One couple was even playing on court 3 which is in super rough shape as all the other were taken.

It is hoped that if the funding request is approved, it will be leveraged as match for an additional grant from the Land and Water Conservation Fund, the United States Tennis Association (USTA) and/or a private foundation so potentially all eight courts could be reconstructed at the same time. Once all eight courts are fully reconstructed, not only would there be courts available for the public's use, Carson City could then again host tennis camps, and revenue generating tournaments for juniors and adults. Local camps and tournaments help maintain and grow tennis participation in the area.

The tennis community is super excited to support this funding proposal and we urge the CC Supervisors to approve this funding so it can be leveraged to renovate all eight courts at the Centennial facility.

Thank you for your consideration.

Sincerely,

Jason Jia

Dear Board of Supervisors-

I hear you are discussing repairing the tennis courts at Centennial Park. Carson City deserves to have well maintained tennis courts- it encourages play in all age groups and maybe we can have a viable tennis club again, compete in leagues and have drop in tennis. I've lived in Carson City since 1980 and have played many times on all the courts. Now I mostly play in Douglas county because the courts are better (Mitch, James Lee and Zephyr Cove). I don't invite my Reno tennis friends to play in Carson because the courts are in such poor repair. It would be wonderful to repair them (not just patches- resurface them) and then stick to a regular maintenance program. Please consider the long term health of our city and keep tennis in Carson. Thank you-
Carel James
