terms; however, by not agreeing to the MPA Vendor may be precluded from doing business with that Member. In the event a Member requires a fee be added to the Contract price (e.g., member levied procurement fee or system use fee), that fee must be added on top of the MMCAP-contracted pricing. 2.2.2. Should any terms in the Contract document or other attachments conflict with the state-specific terms set forth in *Attachment C*, the terms set forth in *Attachment C* shall take precedence over the terms of the Contract document, but only as between the Vendor and the MMCAP Member and/or MMCAP Participating Facility bound by said state-specific terms. No other State shall be bound by the terms set forth in any other State's state specific language set forth in the Exhibit provided by an MMCAP Member State and attached to *Attachment C*.

2.2.3. MMCAP and the State of Minnesota shall not be bound by non-Minnesota state-specific terms set forth in any Exhibit included in *Attachment C* at any time, nor when bringing any enforcement action on behalf of MMCAP or the State of Minnesota.

2.2.4. During the term of this Contract other MMCAP Member States may request the MMCAP Office or the Vendor to amend this Contract to include terms and conditions specific to the requesting MMCAP Member State by attaching an Exhibit to *Attachment C* specific to that State. If a MMCAP Member State requests an amendment to this Contract to include their state specific requirements, the Vendor must work with the MMCAP Member State and the MMCAP Office to execute an amendment to this Contract in a reasonable period of time. No verbal or written instructions from the MMCAP Member States, MMCAP Participating Facilities, or any of their staff or state officials to change any provision of this Contract will be accepted by the Vendor without the prior written approval of the MMCAP Office. ATTACHMENT E:
VENDOR'S CONTRACT IMPLEMENTATION AND TRANSITION PLAN

As Henry Schein has held MMCAP supply contracts in the past, the start-up phase for this specific Contract would be a seamless transition. Henry Schein's dedicated account team has proven to MMCAP through our past contract our ability to handle the implementation of this contract. All planning, scheduling and coordination of the numerous tasks include location scrubs, new account setups, and sales plan creation to ensure MMCAP locations receive the correct pricing. Throughout the process, the Henry Schein dedicated account team will maintain an up-to-date implementation plan, ensuring that all project tasks are completed within established time frames and in an organized, efficient and successful manner.

Upon award, a custom sales plan will be created for MMCAP with all pricing specific to the MMCAP Contract. All other details bulleted above are sorted out by the MMCAP dedicated account team in tandem with our implementation team to ensure a seamless transition.

Once MMCAP provides their current member roster, Henry Schein will perform a location scrub to indicate active accounts with Henry Schein. However, due to the fact that most customers belong to at least two different GPO partners, we must remain GPO neutral and honor the customer's choice of GPOs. Customer lists are proprietary and confidential and sharing those lists outside of Henry Schein would violate our GPO and customer agreements.

A callout campaign would be implemented by our telemarketing team within 60-days of the contract start date and/or contract execution date, whichever is later. This campaign would involve calling out to all applicable MMCAP members based on the www.mmcap.org membership list. Next, any new accounts would be set up in our system through our verifications team and assigned a team of telesales and/or field support. The Henry Schein consultant will work with each site to assist with the setup of on-line ordering, initial order processing and to provide support regarding Product inquiries and resolution of customer service issues on an ongoing basis. They will also work with MMCAP members to ensure that Product standardization and Contract utilization is a part of the educational process at each site. For existing accounts, an account/location scrub would be performed to indicate active/existing Henry Schein accounts for MMCAP members to ensure they are connected to the proper new sales plan.

ATTACHMENT G: VENDOR'S SHIPPING POLICY

Delivery can be made via parcel shipment to a general receiving area, or internally to various departments within the same address if they have their own suite numbers. Delivery via parcel is next day. Orders transmitted to the distribution center by 4:00pm (EST) will be shipped the same day, for next day delivery. Henry Schein utilizes UPS for parcel services. There is no maximum amount of orders per week for MMCAP Members, although we do work alongside MMCAP Members to ensure they are placing orders efficiently which saves time and money. The sales team can work with the Member(s) and UPS should the customer need scheduled delivery times. Same day delivery is a possibility but may be subject to an additional fee.

Henry Schein's policy is to provide free freight, except for additional carrier charges related to special delivery services and hazardous material shipments. Special orders, drop ship orders, equipment delivery, and holiday, weekend or expedited deliveries may be subject to additional freight charges.

99.9% of all orders received are shipped from one of our distribution centers the same day they are received. 98% of our orders are delivered within one business day. The remaining 2% of our orders are delivered the second business day. In an emergency, UPS guaranteed early next-day delivery is available for a nominal fee.

Henry Schein will deliver to MMCAP member's receiving dock, warehouse or agreed upon drop ship location.

ATTACHMENT H: VENDOR'S STOCK OUTAGE AND BACKORDER POLICY

Backorder Policy:

If the local distribution center is out of stock of any item, two things will happen. First, a stocking order is rushed from both the Manufacturer and from our next closest distribution center to fill the shelves. Second, any item that is out of stock will be automatically shipped from our next closest distribution center to our customers.

Backorder Notification:

Backordered or out of stock Products can be communicated a number of ways. If an Order confirmation is requested, the status of each item on the order (i.e. shipping, back ordered, or drop shipped) will appear on the confirmation. Order confirmation can also be sent via EDI or using the Order tracking feature on the Henry Schein website. As the Order is shipped, the paperwork included with the shipment will show backordered items listed as such. We have a team in place to aggressively expedite any items that have low inventory levels, past due Orders or potential out of stocks. This process includes supplier engagement, expedited shipping, and carrier partner distribution center involvement. An estimated ship date will be provided when possible.

ATTACHMENT J: VENDOR'S PRODUCT RECALL PROCEDURES/POLICIES

When notified by the manufacturer of a recall and/or advisory, our customers are notified within 72 hours. Once we are provided a list of Products we will review and notify MMCAP if there are any possible advisories or recalls which have not been announced to the public.

Henry Schein has implemented systems and procedures to timely and effectively conduct Product recalls/withdrawals initiated by a manufacturer, the FDA, or any other recalling firm as well as to ensure compliance with all appropriate laws and regulations.

When a recall/withdrawal notification is first received, Henry Schein assures all pertinent information is included within the notification. Once all of the required information has been obtained, we will proceed to determine if Henry Schein distributes any of the affected Product(s). If it is found that any of our distribution centers have inventory of the specified item(s), the Product(s) are made unavailable for sale (to ensure our customers are not shipped potentially defective Product) and our distribution centers are advised to conduct an inventory check to pull any affected Product. If affected Product is found on hand, it will be removed from saleable inventory and placed into quarantine where it will remain until the final disposition of the Product has been made.

Product recalls/withdrawals are conducted to the Wholesale, Professional/Retail or End-User Level, as instructed by the recalling firm initiating the action to be taken. For Product recalls/withdrawals conducted to the Professional/Retail or End-User level, Henry Schein will build a database for all customers who may have potentially received the affected Product(s). Henry Schein will send out a comprehensive recall/withdrawal notification, via first class mail, to these accounts within 72 hours of the receipt of the original recall/withdrawal notification. Notifications to our customers will include Product codes and lot numbers for the items on recall, the reason for the recall and the corrective action to be taken.

For recalls/withdrawals in which customers will be instructed to return affected Product, their accounts will be credited for the Product returned as well as the shipping expenses associated with the return of the affected Product(s).

Henry Schein's systems are updated with the relative recall information to ensure any affected Product on any incoming shipment will be flagged and will not make into our inventory.

ATTACHMENT K: VENDOR'S BUSINESS INTERRUPTION PLAN

Henry Schein, Inc. is committed to safeguarding the interests of our customers if faced with an emergency or significant business disruption. This statement summarizes Henry Schein's effort to mitigate risks inherent with unforeseen business interruptions.

Our comprehensive business continuity strategy is designed to enable us to meet our existing obligations and minimize disruption to our customers even in the event of an emergency or significant business disruption. The safety and well-being of Team Schein Members (Henry Schein employees) is also a vital concern. If an emergency or significant business disruption should occur, Henry Schein will communicate with Team Schein Members using a combination of direct communications as well as a dedicated Team Schein Member Information Line. Team Schein Members will in turn be in direct communication with our customers in the event of a business disruption to advise them of the situation and any potential impact to our service levels.

Contingency planning extends to providing alternate methods of service and support to clients affected by disasters and losses, with prioritization given to customer-facing functions. Some of the major components of this plan are:

- Crisis/Incident Management and Communications
- Business Impact Analysis
- Business Relocation
- Manual Workarounds procedures

Henry Schein's recovery strategy uses multiple facilities located far enough apart to diminish risks posed by local disruptions. These facilities are a combination of internal Henry Schein facilities, commercial hot-site recovery space and business partners. This separation is a key element of the Company's overall business continuity strategy. This separation allows us to plan for events at each location individually, as no one event should effect more than a single location simultaneously. The benefit of having only one site in each location means that our response to an event will be the same whether the event is a firm-only business disruption, a disruption to a single building, a disruption to a business district or a citywide business disruption.

For example, if our Indianapolis distribution center sustained meaningful damage from a severe weather event effectively shutting it down for several days, we have the ability to very quickly shift order volume to alternate distribution centers across the country for processing. Each of the fully operations distribution centers would take a portion of the Indianapolis orders volume and process it the same day it's received. We'd then leverage our extensive relationship with UPS and other national carriers to get the orders delivered in a time sensitive manner. We could comfortably operate in this fashion until sufficient repairs were completed at the impacted facility restoring it to full operations.

Our comprehensive business continuity strategy is designed to enable us to meet our customer obligations in the event of most emergency or significant business disruptions. The plan is designed to work in many different emergency situations; but these events are, by their nature, unpredictable and it is impossible to anticipate every scenario that could cause a business disruption. Furthermore, although we are confident in our own preparedness, Henry Schein has no control over the various third party vendors that we must rely upon in the event of an emergency. Our business continuity plans are tested periodically to ensure readiness; yet such tests may not be able to replicate the actual conditions we experience in a real emergency.

A. **Sublocade**: For the Sublocade set forth in Attachment A-1, it is understood and agreed that only MMCAP Members and MMCAP Participating Facilities which are correctional facilities and approved by the manufacturer ("Designated MMCAP Members") are eligible to receive the pricing set forth herein. However, the manufacturer may expand the eligibility of Designated MMCAP Members with written notice to both MMCAP and Vendor, upon which the Vendor may honor the changes so long such changes do not conflict with any applicable law or Vendor's direct agreements with manufacturers. It is understood and agreed that Vendor shall not have any obligation to offer any Sublocade *to* any MMCAP Members or MMCAP Participating Facilities which are not Designated MMCAP Members. MMCAP further understands and agrees that Vendor restricts the sale or transfer of medications to prisons/correctional facilities for use in lethal injections in accordance with Vendor's direct agreement with manufacturers. If this cannot be done or during the term of the Agreement, Vendor is unable to provide, Vendor will provide prompt notice to MMCAP.

Revision 7: A new Section 15.2 shall be added to Article 4 of the Agreement, which will state the following:

Notwithstanding anything to the contrary contained in the Agreement, Paragraph 15.1 of the Agreement will not apply to the Sublocade Products; provided however, in consideration for the administrative support and other services provided by MMCAP in connection to this Agreement, Vendor agrees to pay a Sublocade Products Administrative Fee of 0.25% ("Sublocade Products Administrative Fee") on all Designated MMCAP Members Sublocade Products Net Purchases. It is understood and agreed that the Sublocade Products Administrative Fee shall be provided to MMCAP with the report and timing that Vendor provides the Administrative Fee.

Revision 8: Attachment B, Article III. KEY CONTRACT PERFORMANCE METRICS, Section 2.2 will be amended as follows:
