MEMORANDUM

Date:	January 6, 2023
To:	Darren Anderson, Carson City Public Works
From:	NCE
Subject:	East William Street Environmental Feasibility Study Project: Environmental Site Assessment Technical Memo-Final

Carson City (City) has retained NCE to conduct background research and database searches of readily available information in support of the East William Street Environmental Feasibility Study (project) to inform environmental and planning tasks that will need to be addressed during a future National Environmental Protection Act (NEPA) action.

This memorandum details the results of the assessed environmental conditions within and adjacent to the project limits related to known sites that have had documented environmental issues related to the use and/or release of hazardous substances into the environment. Results of a Site reconnaissance are also presented, including a summary of identified parcels where there could be a potential for environmental impacts based on the historical and/or current site use. This memo does not include the details or information that would be considered the full scope of work required to comply with American Society for Testing and Materials (ASTM) or All Appropriate Inquiry (AAI) standards for completing a Phase I Environmental Site Assessment (ESA).

PROJECT DESCRIPTION

The Project is within Carson City, Nevada, and situated within Sections 8-9 and 16-17 of Township 15 North, Range 20 East of the Mount Diablo Principal Meridian (**Figure 1**, figures are provided in **Appendix A**). The established project limits (i.e., the Site) include roughly 1.5 miles of East William Street (between North Carson Street and Russel Way, **Figure 2**). East William Street is classified as a minor arterial and provides access to and connection between Carson City's downtown core, I-580, and United States (US) Route 50. Major signalized intersections within the Project include North Carson Street, North Stewart Street, North Roop Street, North Saliman Road, and I-580. An additional traffic signal at Gold Dust West Way provides access to large commercial complexes. The road currently consists of two lanes in each direction with center turning lanes between North Carson Street and east of North Saliman Road, where it transitions to three lanes in each direction to east of I-580.

The land use is predominantly commercial through the corridor with a variety of customer-centered businesses and offices, including drug stores, restaurants, banks, grocery stores, Nevada State offices, and a church. Mills Park, an approximately 50-acre park owned and operated by the City, borders East William Street to the south between North Roop Street and North Saliman Road. Single and multifamily residential areas are adjacent to the commercial properties and residents park along the corridor but do not directly front East William Street.

The Project will provide roadway, bicycle, pedestrian, safety, beautification, and utility improvements to East William Street, creating an efficient multimodal roadway along one of Carson City's primary commercial corridors.

The Project specifically includes pavement rehabilitation and reconstruction treatments throughout the corridor, access management infrastructure to improve safety and circulation for commercial driveways and side streets, enhanced street lighting, a signalized pedestrian crossing, bus stop amenities to support a planned transit line along the corridor, electric vehicle charging stations at Mills Park, sidewalk infrastructure to establish compliance with the Americans with Disabilities Act (ADA), traffic signal infrastructure upgrades, added bike facilities, landscaping and streetscape beautification, undergrounding of overhead power and communication lines and upgrades to water, sewer, and storm water utility systems, including low-impact-development (LID) storm water infrastructure.

Roadway upgrades will consist of surface rehabilitation or reconstruction and restriping. Reconstruction and restriping are likely between North Carson Street and Roop Street. Surface rehabilitation and restriping are likely from Roop Street to Gold Dust West Way. Roadway improvements will include excavation to an average depth of two to three feet below current grade, which will occur within the prism of past disturbance.

Medians will be installed throughout the corridor where restricting movements is recommended in the traffic analysis, to promote traffic calming, improve safety and access management, and provide opportunities for landscaping and pedestrian refuge. A signalized pedestrian crossing and refuge will be installed at State Street. In addition, driveway accesses may be consolidated to reduce friction with the vehicular traffic in the travel lanes. Additional parking will be provided at Mills Park.

Existing street lighting along the Project corridor comprises of streetlights owned and operated by NV Energy. These lights are typically "night-guard" style lights on wooden utility poles on the south side of East William Street and approximately 25-foot steel light poles with roadway cobra head luminaires on the north side. The Project includes pedestrian scale lighting from North Carson Street to North Stewart Street consisting of 12-foot post-top-lantern-style luminaire, installed approximately

90-feet apart and 30-inches behind back of curb, as space allows for Americans with Disabilities clear path. Lights will be installed along both sides of the roadway in this section.

Cobra head luminaires will be installed from North Stewart Street to I-580, consisting of steel poles and roadway luminaires. These poles follow Nevada Department of Transportation specifications for Type 7 (single head) and Type 14 (dual head) poles, consisting of a 28.5-foot-high pole with a 15-feet mounting arm, at a 34.5-foot luminaire mounting height. Typical poles will be a single head Type 7 pole, with dual head Type 14 poles installed along Mills Park to provide additional lighting along the park pathway and parking areas.

Spacing of the light facilities will depend on the final scope of the lighting system. If lights are installed along both sides of the roadway, spacing can be approximately 275 feet. However, if lighting is only installed on the south side, the spacing will need to be reduced to approximately 175 feet. Lights will be installed at back of sidewalk, or outside of the clear zone where sidewalks are offset from the edge of roadway. Type 7 and Type 14 poles will be breakaway poles. Exact distribution and spacing will be determined by photometric calculations based on the streetscape layout. Photometric performance will be designed to meet the Illuminating Engineering Society (IES)-recommended practice guide for roadway lighting; RP-8-18 "Roadway Lighting" (IES 2018).

The new street lighting will be powered from new metered electric services installed in the Project right-of-way. A service pedestal can typically serve a 1,000-foot radius while maintaining an acceptable voltage drop. Conductors will be designed to limit voltage drop to a maximum of five percent as recommended by the National Electrical Code. Branch circuit conductors will be installed in two inch (minimum) polyvinyl chloride conduit. Typical proposed services are 100-amp, 240-volt, single phase.

All downtown style light poles will have a ground-fault circuit interrupter (receptacle installed for decorative string lights). Lights and receptacles will be controlled by a photocell switch for automatic dusk-to-dawn operation.

A minimum of two Level-2 electric vehicle charging stations will be provided in the Mills Park parking area, with service pedestals located nearby.

The Jump Around Carson public transit system will be expanded to provide eastbound service along East William Street from North Carson Street to the I-580 interchange and westbound service from the I-580 interchange to North Roop Street. Potential locations for eastbound stops include near Plaza Street, North Valleys Street, the Community Center, Mills Park, North Saliman Road, and Gold Dust West Way. Potential westbound stop locations include near Russell Way, North Saliman Road,

and State Street. Each transit stop will include a bus pullout with loading zone and may include amenities including a bench, trash can, and sign.

Pedestrian facilities will be reconstructed to comply with ADA accessibility requirements. Improvements will include removal of obstructions, widening of sidewalks, installation of ramps and bulb-outs, additional crosswalks, and other pedestrian improvements, all intended to provide a more inviting and safer walking environment. Physical signal modifications are anticipated at cross-streets along William Street due to sidewalk widening and other pedestrian improvements. Signal modifications may require excavation to a depth up to fourteen feet below ground surface. The Project includes dedicated bicycle lanes throughout the Project area.

Existing landscaping will be preserved where possible. Landscaping elements including planter softscape areas with trees and hardscape areas of varying textures will be installed throughout the project area. Some medians will feature planter softscape areas. Landscaping selected for installation will be consistent with the Carson City Plant List and Tree List.

Overhead utilities between North Carson Street and Saliman Road may be relocated to remove obstructions within the sidewalks. Buildings currently served by overhead utilities will be converted to underground service. Aging subsurface utilities including sewer and water will be replaced. In addition, drainage improvements including catch basins, storm drain main and laterals, and low impact development improvements will be implemented throughout the project area. Interconnect conduit for future fiber optic communications will be installed. Storm drain improvements and utility relocations may require excavation to a depth varying from two to twelve feet below ground surface.

Most of the Project improvements will be placed within existing rights-of-way. Permanent and temporary construction easements on up to 30 parcels are proposed. The permanent easements are required for pedestrian ramp, sidewalk, utilities, and signal modification improvements. The temporary construction easements are required for construction of sidewalk improvements, pedestrian ramps, bus stops, landscaping, lighting, driveway transitions, utilities, grading, and signal modifications. If possible, staging areas will be located on paved or previously disturbed areas (**Figure 2**)

Currently, a preliminary design of the proposed Project is available. Final project design is anticipated by Summer 2023. Right-of-way activities would occur in 2023. Utility relocation and project construction would occur in 2024.

ENVIRONMENTAL SITE ASSESSMENT

Readily available information to evaluate historic and current uses, within and immediately adjacent to the project area, were reviewed to assess the potential for impacts to soil and groundwater. This review focused primarily on those concerns that may impact future construction, ROW encroachment, and land use as described below.

Scope

The purpose of this assessment was to identify, to the extent feasible, environmental concerns resulting from the improper use, manufacture, storage, and/or disposal of hazardous or toxic substances within or adjacent to the project area. In this assessment, an environmental concern is defined as possible adverse impacts from hazardous substances to soil and/or groundwater as a result of present or past uses on or adjacent to the Site.

The scope of this environmental assessment included a review of the following:

- available environmental databases maintained by federal, state, and local agencies,
- readily available historic documents, including topographic maps, aerial photographs,
- available certified Sanborn fire insurance maps, building permits, city directories, and property tax maps, as summarized in the Radius Map Report generated by Environmental Data Resources, Inc., and
- a Pre-Survey Questionnaire completed by Darren Anderson of Carson City and submitted to NCE on March 21, 2022.

A site reconnaissance was performed on March 18 and again on December 1, 2022, by NCE personnel, who walked the extent of the Site, along eastbound and westbound portions of East William Street, to visually observe Site conditions for evidence of environmental impacts and current land use.

Site Description, Geology, and Hydrogeology

The Site is located within the limits of Carson City, Nevada, and encompasses an approximate 29-acre area of the East William Street alignment, extending east for approximately 1.46 miles from the intersection of North Carson Street to just west of I-580 (see **Figures 1 and 2**). The region's climate is characterized as semi-arid with dry, hot summers, and cold winters. The average annual precipitation for the area is 9.67 inches. The elevation of the Site ranges from approximately 4,700 feet near North Carson Street to approximately 4,650 feet near I-580.

A tributary of Mexican Ditch is approximately 150 feet east of the Site and flows to the southeast. Ash Canyon Creek terminates approximately 0.6 miles west of the Site and flows to the east. The National Wetlands Inventory depicts a 9.18-acre freshwater emergent wetland habitat approximately 0.15 miles south of the eastern portion of the Site, east of Carson High School. Depth to groundwater at USGS well #391016119433901, located approximately 0.75 miles southeast of the Site near Terrace Park, ranges seasonally between approximately 18 and 24 feet below ground surface.

The Site is located in the Carson Valley, bounded on the west by the Carson Range of the Sierra Nevada, and on the east by the Pine Nut Mountains. The Site is underlain by fluvial deposits ranging in age from middle Pleistocene to recent.

Current Site Use

Most of the Site is currently within the Carson City right-of-way and consists of East William Street. Portions of the Site will encroach onto neighboring parcels adjoining East William Street. Surrounding land use is commercial, beyond which in some areas are residences. Water, sewer, and storm drainage facilities within the Site are administered by Carson City Public Works. Electricity is provided by Nevada Energy, and natural gas is provided by Southwest Gas.

Historical Site Use

Topographic Maps

- On historical topographic maps from 1891 and 1893, a railroad is depicted along the alignment, which was in service from 1869 to the 1950s.
- In 1956, the alignment is depicted as Highway 50, and a golf course is south of the central portion of the Site. Structures are depicted along the central portion of the alignment.
- In 1974, additional commercial structures are visible along the eastern portion of the alignment on a USGS orthophoto quad.
- In 1982, an athletic field is south of the central portion of the Site. Commercial development is depicted adjacent to the eastern portion of the Site.
- In 2014, I-580 is depicted just east of the Site.

Aerial Photographs

- In 1939, a railroad appears in the Site alignment.
- In 1953, a road appears in place of the railroad. Sparce commercial development appears in the eastern portion of the Site. Residences and

commercial structures appear in the western portion of the Site. Additional development appears south of the Site extending eastward from Carson City.

- In 1966, additional development appears south of the Site extending eastward from Carson City.
- In 1974, a high school appears south of the eastern portion of the Site.
- In 1980, only the eastern portion of the Site is depicted on the map. Commercial development appears north of the eastern portion of the Site, and an athletic field is adjacent to the south of the central portion of the Site.
- In 1984, a park appears south of the central portion of the Site.

Sanborn Fire Insurance Maps

Sanborn fire insurance maps are not available for the Site.

Building Permits

Building permits were not found in the report generated by EDR for parcels on East William Street. Permits for parcels adjacent to the project alignment did not indicate the installation or use of improvements such as underground storage tanks (USTs), aboveground storage tanks (ASTs), or other improvements of concern.

Property Tax Map Report

EDR's Property Tax Map Report has no coverage of the Carson City area.

Radius Report

As part of this assessment, NCE conducted a records search using electronic database services provided by EDR in a Radius Report generated on January 31, 2022. The report is a listing of facilities identified on select federal and state databases within a 1-mile radius of the Site. NCE reviewed each database in the report. The following list details current and former facilities provided in the EDR Report that are within or adjacent to the Site and that have stored, used, or had releases to soil and/or groundwater of hazardous substances.

The facilities listed below are adjacent to the project limits. The potential for adverse environmental conditions to adversely impact conditions within the project limits is low to moderate.

- **Cordas Chevron /Jackson Food Store #169/ – 1102 North Carson Street**

This fuel station is listed in the NV UST database as having four 10,000-gallon fuel USTs which are currently in use, and a 1,000-gallon waste-oil UST that was removed in 2004. The NV LUST database lists this facility as having a leak of fuel that impacted

soil. This regulatory case was closed in 2004. This fuel station is an environmental concern for the Site.

- **Carson Central Gasoline /Arco Facility #82380/– 1017 North Carson Street**

This facility is listed in the NV LUST database as having one active 20,000-gallon fuel UST and three 12,000-gallon fuel USTs that were removed in 2003. A release to soil of diesel fuel was reported in 2003. The regulatory case was closed in 2012.

- **Former Virginia & Truckee Shop Complex – 201 East William Street**

According to the US Brownfields database, this property was used as a railroad service facility that operated from 1873 to 1950. A Phase II ESA was conducted in 2011, which found asbestos, arsenic, petroleum, and volatile organic compounds in soil and/or groundwater at the Site.

This historical railroad facility likely utilized the three parcels adjacent to 201 East William Street including the current Jack in the Box parcel. Currently, there is relatively new construction on the parcels adjacent to 201 East William Street consisting of the Jack in the Box restaurant and parking areas.

- **Smith's Fuel Center #356 – 599 East William Street**

This fuel station is listed in the NV UST database as having one 8,000-gallon, one 10,000-gallon, and one 20,000-gallon UST. No releases are reported for this facility.

- **Chevron/Jackson Food Store #128 – 1400 Rand Avenue**

This facility is listed in the NV LUST database as having one 6,000, one 8,000, and one 10,000-gallon UST. A release of fuel to soil was reported in 1998, and the regulatory case was closed in 2007.

The following facilities are listed in the environmental databases reviewed but are not adjacent to the project limits. These facilities are included within the environmental databases reviewed because they are permitted facilities utilizing hazardous substances although no violations or issues have been reported. The potential for releases from these facilities to adversely impact conditions within the project limits is low.

- **Capital Cleaners - 1994 East William Street**

This facility is listed in the EDR Hist Cleaner database as a former dry-cleaning business. No regulatory case for a release from this facility is noted.

- **Capital Cab/ Midas Muffler – 1705 East William Street**

This facility is listed in the NV UST database as having a 500-gallon waste oil UST that was removed in 1998. No regulatory case for a release from this facility is noted.

- **Coast to Coast Hardware – 2290 East William Street**

This facility is listed in the NV RGA LUST database, with no additional information. This facility is listed in the Nevada Department of Environmental Protection (NDEP) website as having a release of Kerosene to soil. The regulatory case was closed in July 1992.

- **Kit Carson Cleaners – 2520 East William Street**

This facility is listed in the EDR Hist Cleaner database as a former dry-cleaning business. No regulatory case for a release from this facility is noted.

- **Mercury Cleaners – 2188 East William Street**

This facility is listed in the EDR Hist Cleaner database as a former dry-cleaning business. No regulatory case for a release from this facility is noted.

- **Carson Car Wash – 408 East William Street**

This facility is listed in the NV RGA LUST database, indicating that a release of fuel from an UST occurred at this location. Three 10,000-gallon fuel tanks were installed at this facility in the 1970s, with the last one being removed in 2000. No other information regarding this case is available.

- **Andy Bitti Motors, Inc. – 220 East William Street**

This facility is listed in the NV UST database as having a 2,000-gallon gasoline UST that was removed in 2000, and a 500-gallon waste-oil tank that was removed in 2009. Two regulatory cases for this facility are listed in the NDEP website for releases of hydrocarbons to soil. The regulatory cases were closed in 1990 and 2016.

- **Williams Street Property – 1208 East William Street**

This property is listed in the US Brownfields database as a propane storage and sales facility from the 1950s until sometime around 2000. No other information is listed regarding this facility.

- **Chin Heui – 1426 East William Street**

This facility is listed in the EDR Hist Cleaner database as a former dry-cleaning business. No regulatory case for a release from this facility is noted.

- **Quickie Cleaners – 599 E William Street**

This facility is listed in the EDR Hist Cleaner database as a former dry-cleaning business. No regulatory case for a release from this facility is noted.

Site Reconnaissance

On March 18, 2022, and again on December 1, 2022, NCE personnel conducted a Site reconnaissance to assess current land use that may represent an environmental

concern and that could have an adverse impact to the project and planning process. The weather at the time of the visit was cool, clear, and sunny.

Summary of Observations

The Site is mostly comprised of the current Carson City Right-of-Way, including East William Street and associated sidewalks, curbs, and gutters. The project limits boundary map provided by the City indicates that portions of some adjacent privately owned parcels are also within the project limits and will require construction easements to meet project objectives. Most of these areas include paved and landscaped areas. No structures are within the project limits. Several automotive fueling stations are partially within or adjacent to the Site, including Carson Central Gasoline, Chevron (2 locations), and Smith's. Capitol Cab is located at 1705 East William Street and was found to have an intact well box behind the structure next to a vehicle lift, indicating that an environmental investigation was conducted at this location in the past although no details were available.

Findings and Recommendations

Findings

This section details environmental concerns that were identified at the Site during this assessment. Listed below is a summary of those concerns followed by general initial recommendations based on the findings to date:

- Current and former automotive fueling stations are commonly associated with impacts to soil and groundwater from leaking USTs. Carson Central Gasoline (1017 North Carson St.), Smith's Fuel Center (599 East William Street), Cordas Chevron/Jackson Food Store #169 (1102 North Carson Street), and Chevron/Jackson Food Store #128 (1400 Rand Avenue) represent environmental concerns. Concerns would consist of potentially encountering undocumented hydrocarbon impacted soils and/or shallow pipeline/UST facilities within the construction easement during the planned shallow grading or drilling activities associated with foundations for streetlights or other amenities requiring deeper foundations.
- The Former Virginia & Truckee Shop Complex (201 East William Street) is the location of documented impacts to soil and groundwater from past use as a railroad maintenance facility. This parcel and the adjacent parcels (301, 305, and 309 East William Street) on the south side of East William Street between Plaza Street and Stewart Street represent an environmental concern. The potential concern for these parcels is the same concern noted above regarding encountering unforeseen conditions in the shallow subsurface during construction.

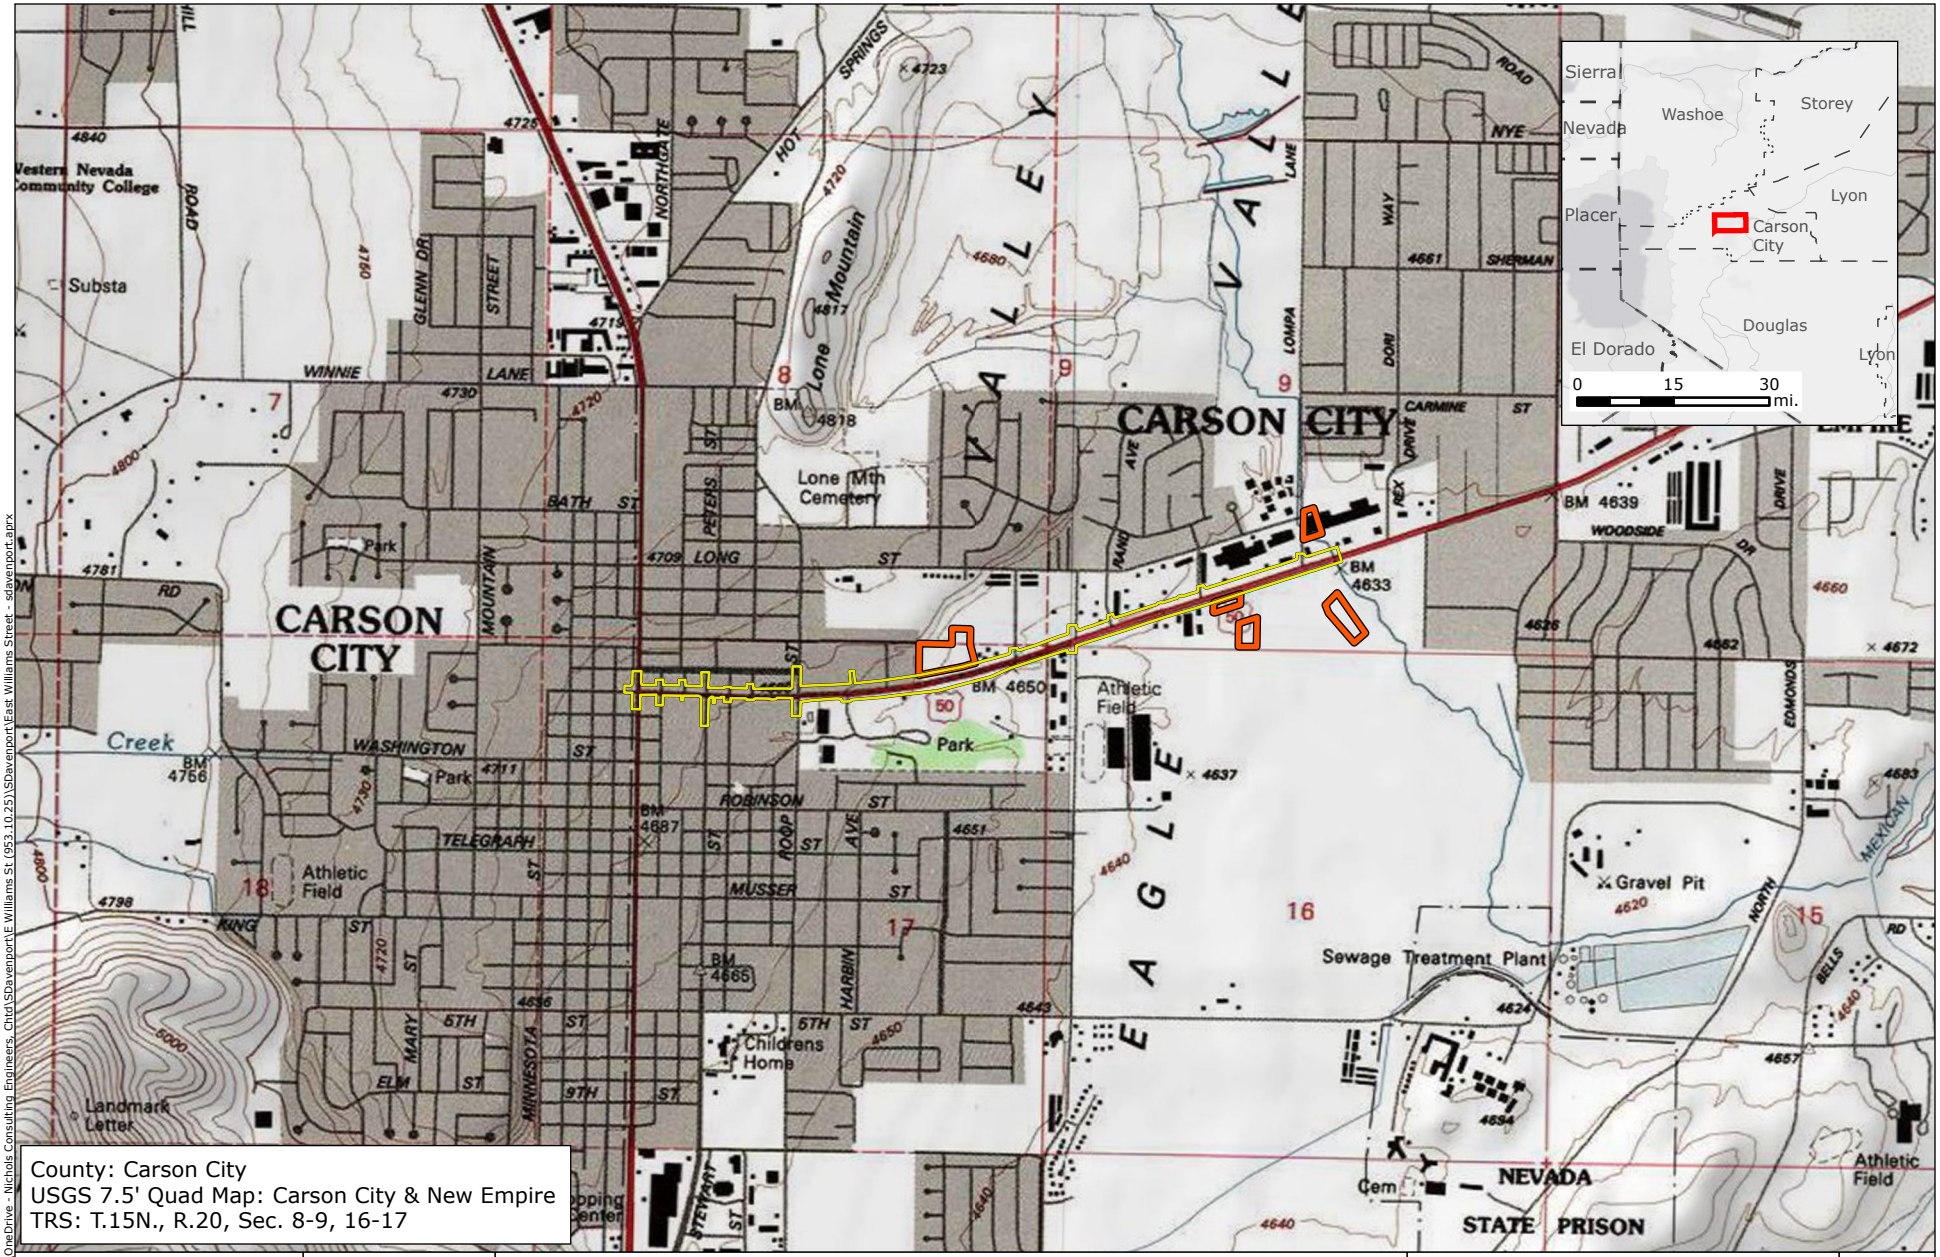

- Aerially deposited lead (ADL) is lead originating from automotive exhaust gases that settle in soils near roadways. ADL is commonly found in shallow soils (as deep as 3 feet) near roadways that existed during the time that gasoline contained lead. Leaded gasoline was banned by the United States Environmental Protection Agency (USEPA) in 1996. East William Street has existed since sometime after 1939 and prior to 1953. ADL is a constituent of potential concern in near surface Site soils along the entire project. This concern is related to the handling and disposal of any surplus soils that may be generated during construction.
- A monitoring well box was observed just south of the Capitol Cab building (1705 East William Street), indicating impacts to soil and groundwater may be present on this parcel, which is an environmental concern. Concerns would consist of potentially encountering undocumented hydrocarbon impacted soils during the planned shallow grading or drilling activities associated with foundations for streetlights or other amenities requiring deeper foundations.

Recommendations

- For excavation activities associated with improvements near fueling stations and adjacent to the areas of concern noted adjacent to the Site, the contractor shall prepare a soil management plan (SMP) that details how impacted soils can be identified and properly managed and disposed. The SMP should address how the contractor will manage any excess soils that will need to be disposed of off-site. These procedures should include the proper handling, stockpiling, chemical profiling (if required by disposal facilities), hauling, and manifesting of excess soils disposed of off-site.
- Parcels 00216102, 00216108 and 00216109 are adjacent to the east of the Former Virginia & Truckee Shop Complex. NCE understands that the City may acquire permanent and temporary easements on portions of these three parcels to install pedestrian and utility improvements. It is assumed that these three parcels were once part of the Shop Complex prior to being developed into a parking lot and restaurant. Impacts from former railroad operations may be present on these parcels. Prior to acquiring permanent and temporary easements on these parcels and conducting subsurface construction activities, the City may want to consider conducting a soil investigation to determine if impacts to soil from past use are present.
- Construction staging areas selected should include those where no grading activities or ground disturbances are needed, and Best Management Practices (BMPs) shall be deployed to minimize potential impacts to selected properties.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by NCE were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR® Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of NCE on Jan 31, 2022.

TARGET PROPERTY

East William Street
Carson City, NV 89701

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

EXECUTIVE SUMMARY

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/20/2021 has revealed that there are 3 SEMS sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CARSON HIGH SCHOOL M Site ID: 0908581 EPA Id: NVN000908581	1111 N. SALIMAN RD	E 1/8 - 1/4 (0.228 mi.)	U128	250

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 15 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 21 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CARSON CITY COAL GAS	E WILLIAM STREET	0 - 1/8 (0.000 mi.)	E40	62

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and

operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 6 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

EDR RECOVERED GOVERNMENT ARCHIVES

Exclusive Recovered Govt. Archives

NV RGA HWS: The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Conservation and Natural Resources in Neveda.

A review of the NV RGA HWS list, as provided by EDR, has revealed that there are 5 NV RGA HWS sites within approximately 0.001 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CARSON CAR WASH Facility ID: 1-000010	408 EAST WILLIAM STR	0 - 1/8 (0.000 mi.)	D30	39
ANDY BITTI MOTORS, I Facility ID: 1-000014	220 EAST WILLIAM STR	0 - 1/8 (0.000 mi.)	E31	40

Lower Elevation	Address	Direction / Distance	Map ID	Page
HOME FAMILY TRUST	1882 HIGHWAY 50 EAST	0 - 1/8 (0.000 mi.)	A2	8
COAST TO COAST HARDW Facility ID: 1-000129	2290 HIGHWAY 50 EAST	0 - 1/8 (0.000 mi.)	C16	31
COAST TO COAST HARDW	2290 HIWAY 50 EAST	0 - 1/8 (0.000 mi.)	C25	37

NV RGA LUST: The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Conservation and Natural Resources in Neveda.

A review of the NV RGA LUST list, as provided by EDR, has revealed that there are 5 NV RGA LUST sites within approximately 0.001 miles of the target property.

EXECUTIVE SUMMARY

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
CARSON CAR WASH Facility ID: 1-000010	408 EAST WILLIAM STR	0 - 1/8 (0.000 mi.)	D28	38
ANDY BITTI MOTORS, I Facility ID: 1-000014	220 EAST WILLIAM STR	0 - 1/8 (0.000 mi.)	E50	84
ANDY BUTTI MOTORS, I Facility ID: 1-000014	220 EAST WILLIAMS	0 - 1/8 (0.000 mi.)	E51	84

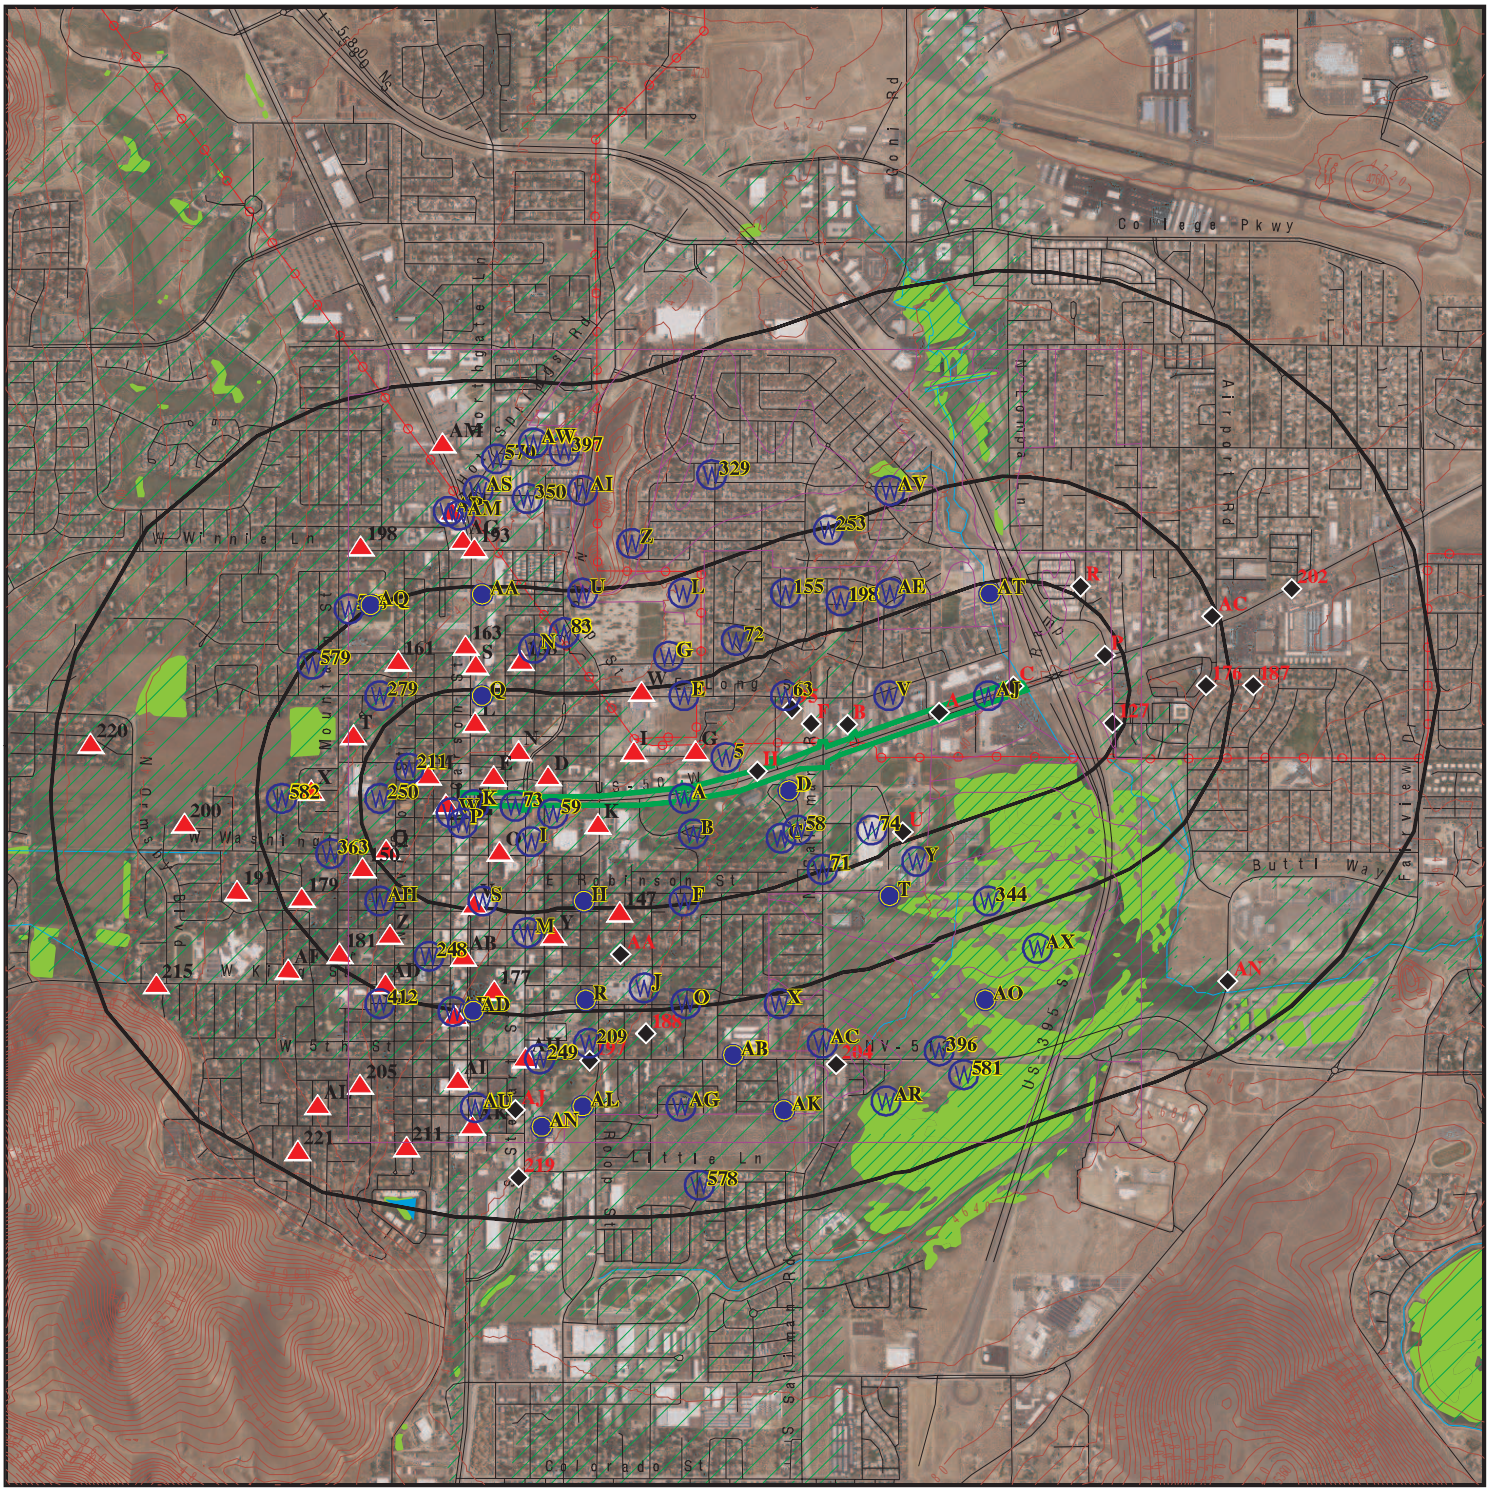

Lower Elevation	Address	Direction / Distance	Map ID	Page
COAST TO COAST HARDW Facility ID: 1-000129	2290 HIWAY 50 EAST	0 - 1/8 (0.000 mi.)	C17	31
COAST TO COAST HARDW Facility ID: 1-000129	2290 HIGHWAY 50 EAST	0 - 1/8 (0.000 mi.)	C26	37

EXECUTIVE SUMMARY

Due to poor or inadequate address information, the following sites were not mapped. Count: 11 records.

Site Name	Database(s)
CUCHARA VALLEY, INC.	PRP
OLD FREMONT PUBLIC SCHOOL	NV SHWS
CHANGE: NDOT	NV SHWS
OLD SAVAGE CONSTRUCTION SITE	NV SHWS
SOUTHWEST GAS CORPORATION (FAB YAR	NV SHWS
QUAIL RUN MOBILE HOME PARK/JOHN SE	NV SHWS
AT&T - MCCLELLAN (NV0010)	NV SHWS
CARSON CITY SCHOOL DISTRICT	NV SHWS
STATE OF NEVADA	NV SHWS
CARSON CITY SHERIFF'S OFFICE	NV SHWS
BRUNSWICK CANYON	NV SHWS

OVERVIEW MAP - 6840252.2S

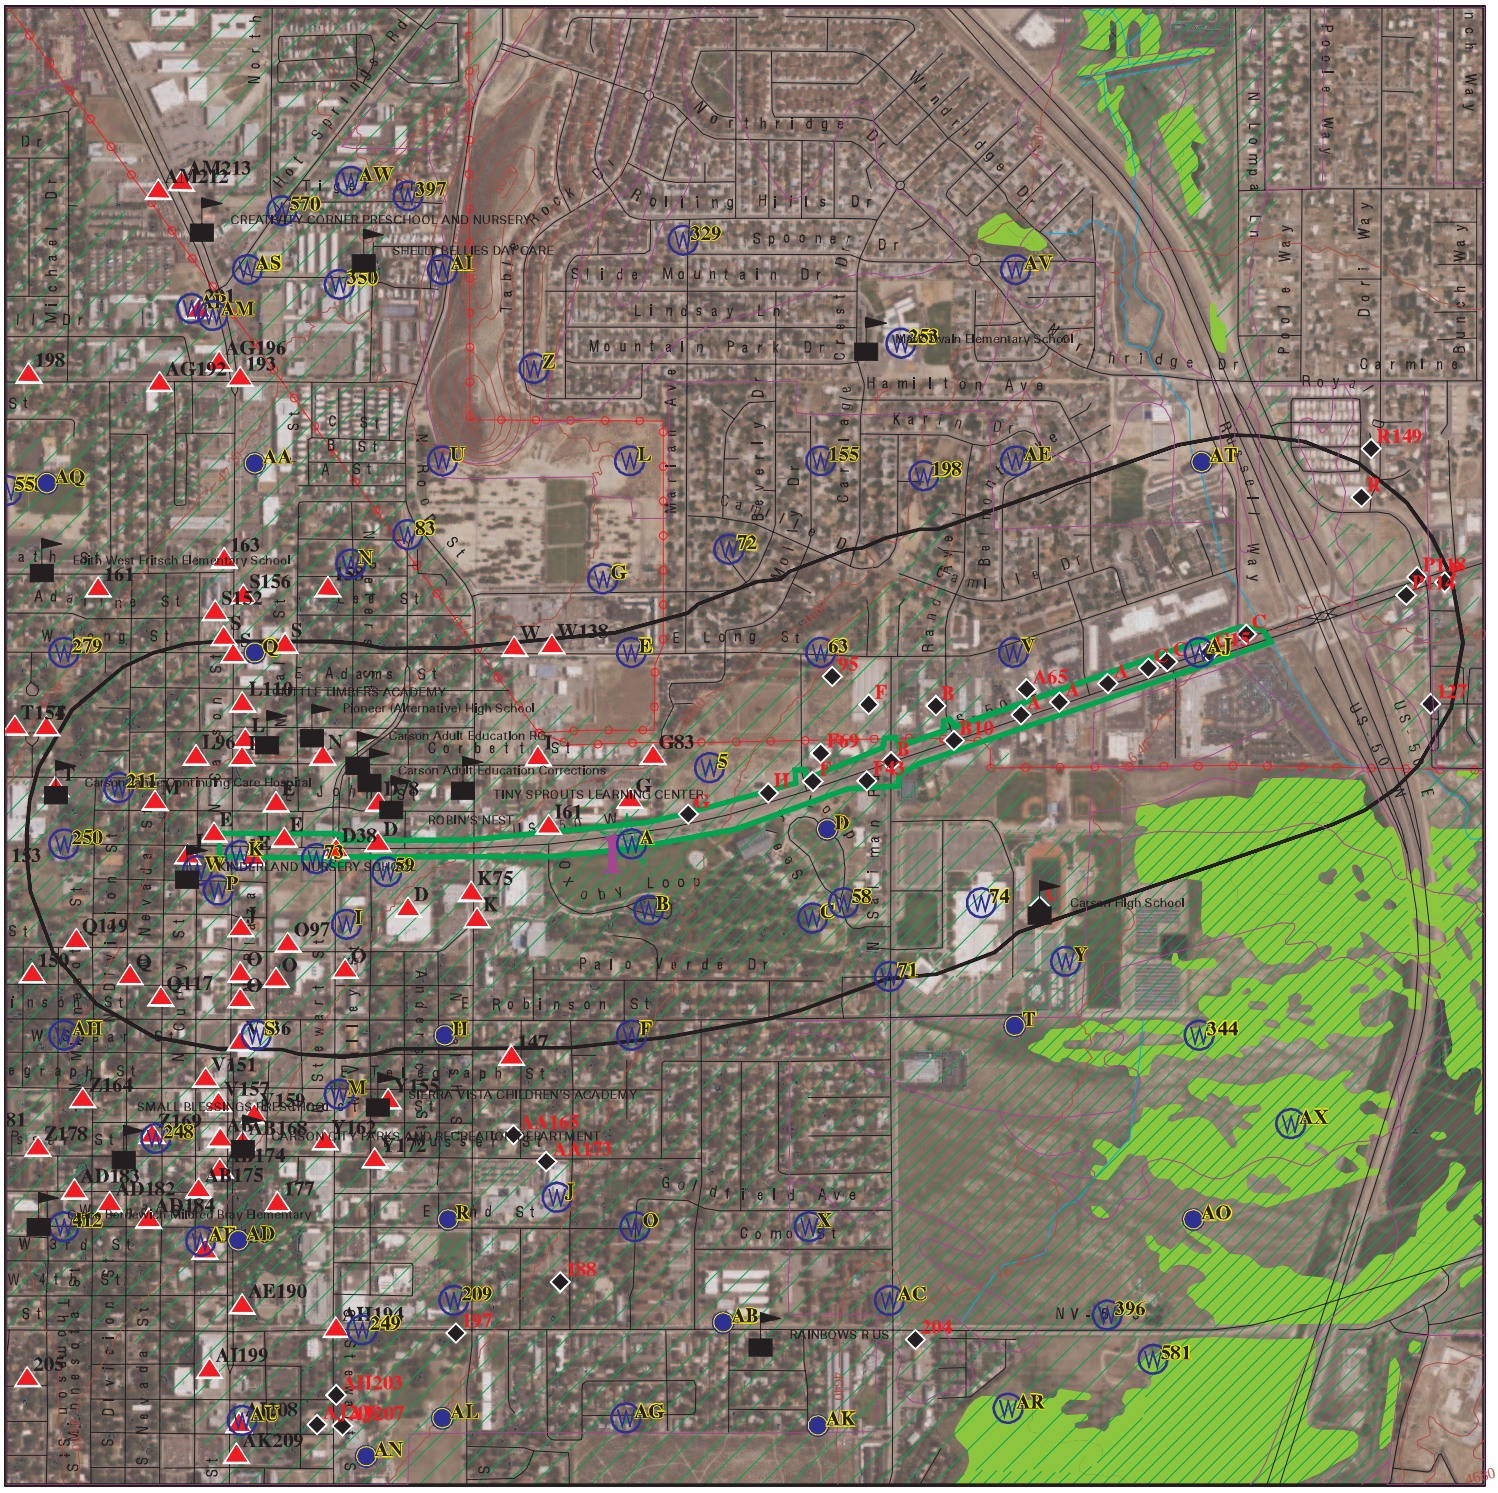

- Target Property
- Sites at elevations higher than or equal to the target property
- Sites at elevations lower than the target property
- Manufactured Gas Plants
- National Priority List Sites
- Dept. Defense Sites
- Indian Reservations BIA
- Power transmission lines
- Special Flood Hazard Area (1%)
- 0.2% Annual Chance Flood Hazard
- National Wetland Inventory
- State Wetlands

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with

SMITH'S FUEL CENTER #392 (Continued) **1010036417**

a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

WALGREENS NO 4788 (Continued) **1001460179**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Recipient Name:	Northern Nevada Development Authority
Grant Type:	Assessment
Property Number:	002-441-49
Parcel size:	2.47
Latitude:	39.1711795
Longitude:	-119.7556734
HCM Label:	-
Map Scale:	-
Point of Reference:	-
Highlights:	Former Use: The Property appears to have been developed with a small structure dating back to at least 1953. No documents regarding the Property+s development prior to 1953 were available for review during this assessment. City directory listings in 1965 and 1970 indicate

WILLIAMS STREET PROPERTY (Continued) **1025961799**

the Property was occupied by Capital Propane Carson City, in 1976 and 1985 by Cal Gas Carson City, and 1990 by Amerigas Carson City. Historical aerial photographs from the 1950s to 1990s appear to show various sized tanks (assumed propane) on the Property and at least one small structure on the southeast portion of the Property. The Property is then listed as Summit Metro Realty in 2003 and Park Auto Sales in 2013. Around 2015-2016 the Property was razed of structures and has existed as a vacant lot since that time.

Property Description:	The Property appears to have been developed with a small structure dating back to at least 1953. No documents regarding the Property+s development prior to 1953 were available for review during this assessment. City directory listings in 1965 and 1970 indicate the Property was occupied by Capital Propane Carson City, in 1976 and 1985 by Cal Gas Carson City, and 1990 by Amerigas Carson City. Historical aerial photographs from the 1950s to 1990s appear to show various sized tanks (assumed propane) on the Property and at least one small structure on the southeast portion of the Property. The Property is then listed as Summit Metro Realty in 2003 and Park Auto Sales in 2013. Around 2015-2016 the Property was razed of structures and has existed as a vacant lot since that time.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

G AND D AUTO REPAIR (Continued) **1004754711**

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Nevada Facility Profile (NV-FP) system contains facility based, integrated environmental information for the State of Nevada. RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Property Description:	Based on a review of historical information, several of the current structures at the Property were constructed in 1944. The earliest available aerial photography from 1953 shows these structures. All of the on-Property structures were present by the time of the 1966 aerial photography. The surrounding area included a mix of commercial and residential structures and reached its present general physical configuration by 1980.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state and tribal brownfield sites

BROWNFIELDS: Project Tracking Database
Brownfields sites included in the Project Tracking Database. The term "brownfields" is used to describe abandoned, idled, or underused industrial or commercial properties taken out of productive use because of real or perceived risks from environmental contamination. The State of Nevada has initiated Brownfields, a land-recycling program, to provide an opportunity to redevelop these undesirable properties and revitalize communities.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Version Date:	2018

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

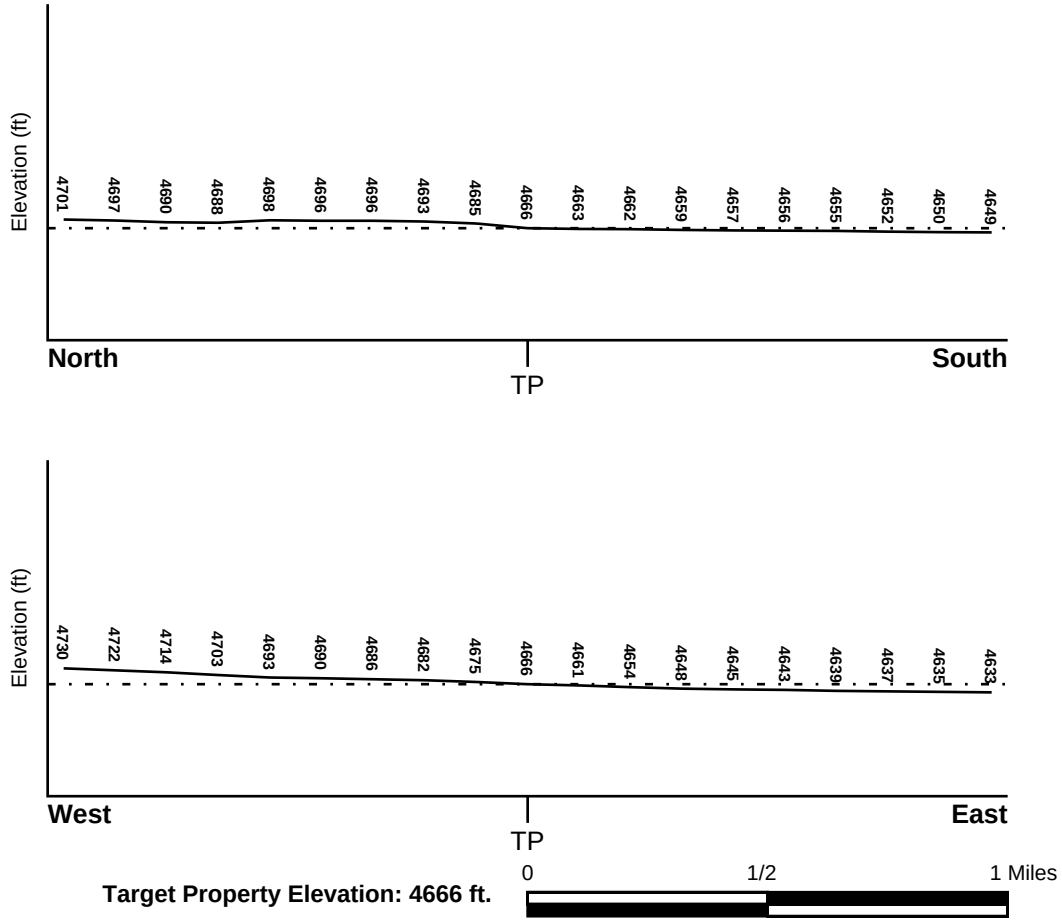

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 4666 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

CARSON CITY	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Natural Heritage Program
Telephone: 775-684-2900

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: NV Radon
Source: State Health Division
Telephone: 775-687-7531
Radon Test Results By Zip Code

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.
