---

For the record I am Kimberlee Lynn Zonge and I live at 1835 Franklin Road which is located off of Goni, north of the Goni/Arrowhead intersection.

Thank you for looking at traffic congestion during peak morning and afternoon times at the intersection. I tend to avoid that intersection during peak times and turn on Sutro to avoid the traffic back up. The backup eases up quickly on Goni but it sounds like the traffic will be increasing. ***I hope that a roundabout will be constructed there rather than a stop light.*** The staff report sums up all of the reasons quite well and I wholeheartedly agree, even though the price tag is a bit shocking for the short term, it will be worthwhile in the long run.

Thank you for your consideration for traffic in our neighborhood.

Kimberlee Lynn Zonge

I read the following article in today's Nevada Appeal: <https://www.nevadaappeal.com/news/2025/jan/06/carson-city-regional-transportation-commission-to-consider-goni-road-roundabout/>. I believe that a roundabout at this intersection is a bad idea, as well as the alternate suggestion of a traffic light. Neither suggested solution would prevent the minor backup at that intersection, which only occurs between 3:00 PM and 4:00 PM. The stop signs work very well for that intersection. The 3.2 million dollar expenditure, which there is currently no funding, would be better used for needed road repairs.

If you look at the roundabout at Carson St and Fairview Dr, you will see that there is frequently a backup on Fairview, despite the roundabout. Putting a roundabout at Goni and Arrowhead will have the same effect. During most of the day, there is absolutely no traffic at this intersection. Building a roundabout or installing traffic signals would be a huge waste of money without any traffic flow improvement.

Please vote "no" against this proposal.

Thanks,  
Mike Lucido
