

E-BIKE SAFETY

FOR PARENTS AND STUDENTS

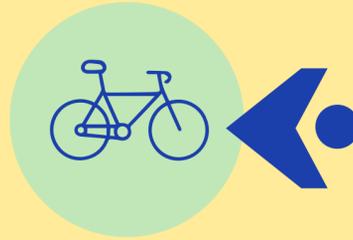

★ E-BIKE ★

- Has fully operable pedals
- Includes a seat or saddle for the rider
- Contains an electric motor of not more than 750 watts, and
- Meets the criteria of one of three classifications (Class 1, 2, or 3)

Class 3 e-bikes should have a functioning speedometer.

E-BIKE CLASSES

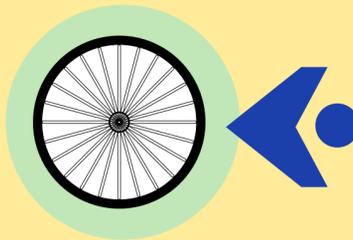

CLASS 1

Pedal-assist only; motor stops when the bicycle reaches 20 mph.

CLASS 2

Throttle-assisted; motor can propel the bike without pedaling, but stops at 20 mph.

CLASS 3

Pedal-assist only; motor stops at 28 mph.

AGE REQUIREMENTS

- Class 1 & 2: No minimum age in state law
- Class 3: Commonly treated as 16+
- Local ordinances may add restrictions on minors, so always check city or county rules

E-bikes should have a label showing class, maximum assisted speed, and motor wattage.

State law prohibits tampering or modification of an e-bike's motor/speed unless the label is updated to reflect the change.

WHEN RIDING BIKES REMEMBER:

Ride on the right, in the same direction as traffic using bike lanes when available.

Stop and look both ways before entering the street.

Stop at all intersections, whether marked or unmarked.

Respect traffic lights and stop signs.

Wear a helmet and do not carry passengers.

When riding at dawn/dusk/night use a front white light, rear red reflector & side reflectors.

E-bikes & E-scooters follow same rules as bicycles in NV

DO I HAVE AN E-BIKE OR E-MOTO? If it doesn't have operable pedals (typically has pegs) and/or goes > 28 mph (SurRon/Talaria-style machine) it may be treated as an e-moto with different regulations.
