

## WHAT IS THE NORTH CARSON STREET FEASIBILITY STUDY?

A feasibility study is an early step that identifies what improvements are practical and effective for a project. The goal is to recommend solutions that are achievable and reflect community needs.

For North Carson Street, the feasibility study will evaluate current conditions and options for safety, traffic, transit, walking and biking, and corridor improvements like beautification and redevelopment.

## WHAT IS COMPLETE STREETS?

Complete Streets is an approach to designing streets so they are safe and usable for everyone: people walking, biking, driving, and taking transit.

Carson City has adopted a Complete Streets Policy to create a connected multimodal transportation system that improves safety, supports sustainable growth, and enhances quality of life. The North Carson Street Complete Streets project is the City's fourth Complete Streets project, building on improvements made on South Carson Street, the Downtown Corridor, and East William Street to complete upgrades along Carson City's major corridors.

## WHAT DOES "MULTIMODAL" MEAN, AND WHAT TYPES OF MULTIMODAL IMPROVEMENTS ARE BEING CONSIDERED FOR THIS COMPLETE STREETS PROJECT?

"Multimodal" means designing a street to safely support all ways people travel, such as walking, biking, driving, and using transit.

For North Carson Street, the project is evaluating improvements such as safer pedestrian crossings, bike lanes, transit amenities, enhanced lighting, and traffic safety features. It also includes potential roundabouts, expanded transit service, a community gateway, and beautification elements like public art to improve the overall travel experience.

## HOW WILL THIS AFFECT MY BUSINESS IN THE SHORT- AND LONG-TERM?

Little disruption is expected in the short-term. During construction, every effort will be made to ensure customers can access your business. In the long-term, North Carson Street is intended to become a destination with improved safety, amenities, and aesthetics.

## WHY ARE WE ASKING FOR YOUR FEEDBACK?

We are asking for your feedback to help shape the future of North Carson Street. Your input helps us understand community needs and priorities as we evaluate improvements like bike lanes, safer crossings, transit amenities, traffic calming, and beautification features.

This feedback ensures the final recommendations reflect how people live, travel, and use the corridor every day.

## HOW LONG WILL THE FEASIBILITY STUDY TAKE? WHAT HAPPENS NEXT?

The feasibility study will take 15 months to complete. The next steps include acquiring funding for the project, conducting an environmental review (18 months), and designing the new improvements (24 months) before construction can begin. Funding for construction has not been identified. Make sure to check [CarsonProud.com](http://CarsonProud.com) for more updates on the feasibility study and the future project.
